Eirmutavate elukordade vastemine ja osnosega sumata seismine Vastikus

## **Online e-counseling**

Counselors are experts with clinical experience Guidlines

They will help to:

- define the problem
- find appropriate expert help
- increase mental well-being and get some relief right away
- raise awareness about the problem or situation

#### KÜSI NÕUSTAJALT

Sul on vaimse tervisega seotud küsimus, mure või kahtlus? Sa ei tea, kuidas edasi minna, mida enda aitamiseks ette võtta, kellega rääkida või millise spetsialisti poole pöörduda? Kirjuta Peaasi.ee e-nõustajatele! Nõustajad on kogemustega vaimse tervise spetsialistid ja vastavad kahe päeva jooksul. Vastus tuleb Sinu e-mailile ning portaalis avalikult ei ilmu. Selleks, et saaksid meilt kindlasti vastuse, kontrolli üle, et e-maili aadress oleks õige. Konfidentsiaalsuse põhimõtetes lähtume Eesti seadusandlusest. Nõustamise eest tasu ei küsita.

Girjuta oma mure s	iia: *		

### Interactive self-help tools

- Based on cognitive-behavioural therapy and Peaasi.ee team members' clinical experience
- Web apps
- For young people who have diagnoses of disorders
- For young people who have any distressing symptoms
- Address some of the most common problems (Fear Ladder, Positive Activities, Anger Boss, Well-being monitor, etc)

## **Brain training exercises**

 Based on neuropsychology and cognitive remediation therapy

- Improve cognitive functioning (memory, attention, etc)
- Relief for problems in cognitive functions due to psychiatric illness (depression, schizophrenia, ADHD, autism spectrum disorders)
- Support general well-being

### **Smartphone apps**

- Apps with self-help functionality:
- 1) deliberate self-harm,
- 2) suicidal behaviour,
- 3) depression,
- 4) sleep problems
